A Period of transformation and accomplishment

Our noble country, in this auspicious time, the era of the Custodian of the Two Holy Mosques, King Salman Bin Abdul Aziz, and His Crown Prince, Deputy Prime Minister and Minister of Defense and the Engineer of Innovation, Change and Development, His Royal Highness Prince Mohammed Bin Salman Bin Abdulaziz, Allah protect them, is witnessing a strategic and industrial shift. Such a shift has stunned the entire world. This shift has been exemplified by our nation's civilizational achievements and the launching of mega-projects in different regions and provinces.

These projects were inaugurated by the Custodian of the Two Holy Mosques in the capital Riyadh on Saturday 12/8/1439 AH.

As is apparent to all, these great projects fall within the framework of the Kingdom's Vision 2030, transforming our country from one that relies on oil exports to an advanced industrial state, depending on the minds, creations and achievements of its citizens, those armed with knowledge and faith after returning to their homeland.

Our gracious country takes utmost care to the guest of the Most Merciful by providing all necessary material and human support. This support is accomplished through the formation of a system of progressive establishments and distinguished services, keen to add new service elements on a continuous basis as necessary. One such addition is the Haramain Railways running between the cities of Makkah-Madina-Jeddah to carry visitors and pilgrims to their destinations.

In this context, all the parties concerned with Hajj and Pilgrimage Affairs have concluded all preparations for the reception of the pilgrims, foremost among them the Ministry of Hajj and Umrah, which concluded their program for receiving most of the heads of delegations of the pilgrims from Arab and Islamic and other countries for this year, 1439 H.

We are fully aware of the great responsibilities entrusted to us as part of the pilgrimage system. Therefore, we always strive to make

the utmost efforts to translate the directives and aspirations of our wise leadership, as well as the ambitions and visions of His Excellency the Minister of Hajj and Umrah Dr. Mohammad Saleh Bin Taher Benten, to serve the pilgrims in the best possible manner, from their arrival in the holy sites till they leave their for homes after smoothly performing the rituals with ease and comfort.

Therefore, since the beginning of the Hijri year 1439 AH, the Establishment has started to plan and prepare the technical studies for all services we are entrusted with to offer to the guests of the Most Merciful.

By the grace of Allah, because of the generous care and attention we have received from our wise leadership, as well as the support of His Excellency the Minister of Hajj and Umrah and the ministry staff, the Establishment has completed its preparations for the Hajj season. These ended with a series of meetings with Hajj affairs officials, finalizing contracts of services with them, completing the formation of field offices and seasonal committees, and preparing their operational plans which were discussed by the ministry in preparation for adoption and implementation on the ground during the pilgrimage season.

Over the past three months, the Establishment has seen continuous and dynamic work, including intensive meetings with presidents, joint partners, members of the field service offices, and all officials of its central committees. All of this occurred in the presence and with the participation of a number of ministry officials and board members. In the previous pilgrimage season 1438H, we worked to develop and upgrade the offices through the introduction of modernized work systems. This raised employees' efficiency and allowed us to study the positive and negative observances, then prepare an analysis of causes.

May Allah preserve our beloved country, and protect our wise leadership, and provide us with security, safety, prosperity and stability. We are ready and prepared to serve the pilgrims.
